

COLORI STRUTTURA - Structure colors

Pannelli nobilitato sp. 18 mm classe E1 (materiale atossico a bassa emissione forma aldeide).

La modularità degli elementi della produzione VISMAP permette in tutti i modelli la scelta del colore della struttura tra le disponibili. Nei modelli laccati ed in quelli in legno é possibile personalizzare nello stesso colore e finitura delle ante i fianchi a vista, i quali vengono sostituiti ai fianchi in nobilitato e non aggiunti così da far rimanere invariate le misure di ingombro degli elementi.

Melanine - faced panels 18 mm depth class E1 (non - toxic material low - release).

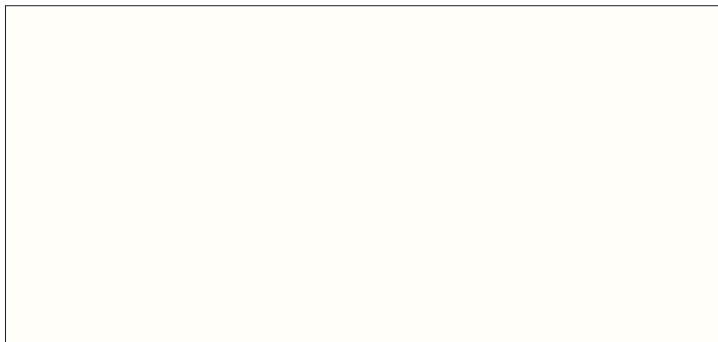

The modularity of the elements produced by VISMAP allows you to choose amongst the carcass colours available for all models. For lacquered and wood models it is possible to personalise the end panels so that they match the colour and finish of the doors. In this case the end panels replace the melanine - faced ones so that the overall dimensions of the elements remain unvaried.

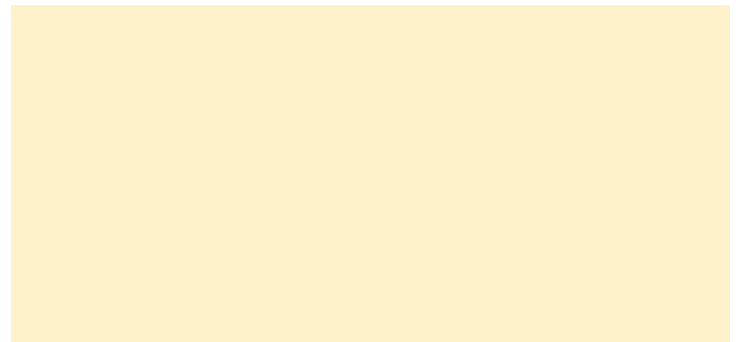

Opz. 09 Noce Scuro Dark Walnut

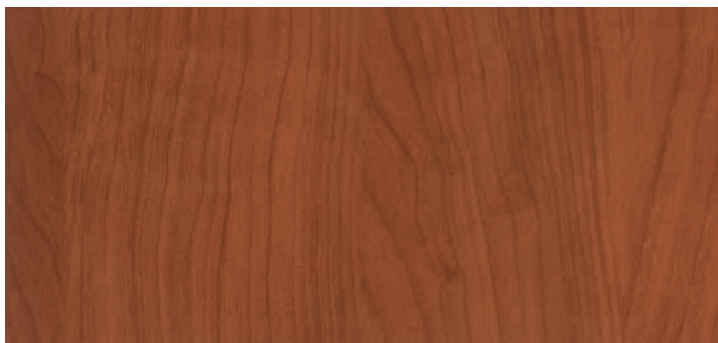

Opz. 06 Alluminio Aluminium

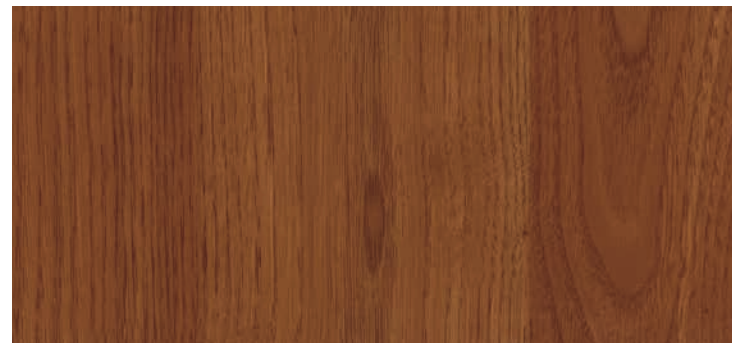

Opz. 03 Bianco White

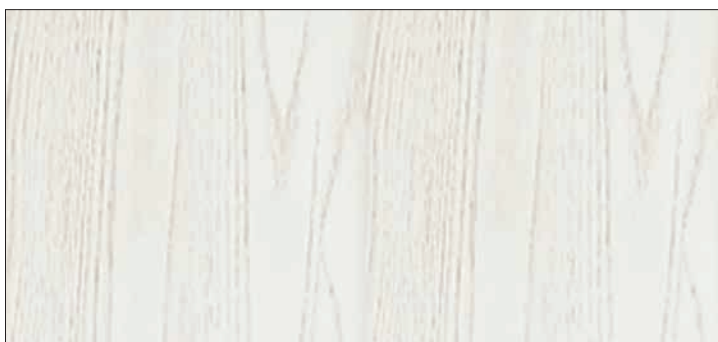

Opz. 08 Panna White cream

Opz. 11 Ciliegio scuro Cherry

Opz. 07 Castagno Chest nut
